

Hello Matt,

Can you please make the following edits:

In the first 6 seconds of the video we show the store front, then again at :22 and again at :43. We do not show the other store until later. I would like for us to appear more inclusive by getting that store shown much sooner.

At :35-38 where we talk about food, maybe include some of the images of shopping bags and carts or sandwich images.

At 1:08-1:10 and little after the voice over is about equitable products. It lingers a bit long on the cans of food. Can we incorporate more food images there as well?

At 1:16 it shows the lower half of the framed image... Then follows with an image of the full frame on the wall. Can we remove that partial frame pic and replace it with something else?

Thanks!
